Subject: RE: EPA inquiry Rigby site - update on asbestos test
Attachments: Tests - Nov and Dec tile samples compiled .pdf

John, the written results are attached. I updated the pdf to show all 3 sample locations and sample results.

I remain puzzled about the conflicting tests results.

We will continue with the clean-up and remainder of the follow-up action plan.

Sincerely,

Sue Sullivan

Thank you for the update, Sue. I will review the whole set of information and get back to you on our agency's view of the situation. I think you are doing the protective and prudent thing to have a cleanup underway at this time.

John, I have received verbal results that the hallway sample was positive for asbestos in both the tile and the mastic. I will send the written report with a sample map as soon as I get it. -Sue

Update on cleanup:

Idaho Abatement has started the cleanup of the break room and the bath room/locker room. They are planning to have those areas cleaned up today 12/10/13. They will start the cleanup of the supply store room on 12/11/13 and are in hopes have it clean the same day.

We will then have it retested by Teton Environmental.

Still waiting on the hallway sample result.

John,

I just got the written report on the air and wipe tests by Teton Environmental. See attached.

I still owe you one more.

Thanks,
Sue

John,

Attached is:

1. The response to your questions,
2. Attachment 1 (drawing of removed tile and test sample locations).

Please note there are two test results still pending. See the notes in red in the response. They are:

1. the final written air and wipe tests
2. another floor tile sample that we got from under a base board.

I will keep you in the loop on our pending test results and will send them as soon as I receive them.

Sincerely,

Sue Sullivan

John,

I thought I would have the final results of the PCM, TEM and surface wipes to attach, to be able to wrap up the responses to the rest of your questions.

The contractor said they'd be in today, but we still do not have them. They did give us a verbal – no asbestos in the air, trace amount found with a wipe on top of a shelf. But I am waiting for the report.

I will pick this back up on Monday.

Sue

John,

I was out of town yesterday and have received your report today. The documents are large – do you have an email limit?

Thanks, Sue

Subject: RE: ITD email for your info

Sue, thank you for sending me your e-mail address. I appreciate that you have gathered some information related to the complaint I brought to your attention. To follow up on our phone conversation last week I would like to ask you for some additional information about renovation work which took place at the Rigby, ID facility operated by the ID Transportation Department.

Please send me the following:

- 2) A copy of the asbestos inspection for the building where a flooring renovation took place.
- 3) A copy of any recent asbestos sampling test results, and describe where the sample(s) were collected.
- 4) Describe the scope of the flooring renovation project which took place early this year (I believe this was in April 2013). For example, include the square footage of the break room and hallway where flooring was removed.

Thank you again for your assistance in this matter.

Sincerely,

John Pavitt
